Outline

- **THE GENEALOGY OF JACOB (2:1-17):**
    + 1 Chronicles 2 is a continuation of the genealogy found in 1 Chronicles 1.
    + It picks up with Jacob (Israel) the grandson of Abraham.
    + The genealogy names Jacob's 12 sons, who became the patriarchs of the 12 tribes of Israel.
    + The family tree continues through Jacob's son, Judah, until it reaches King David.
- **THE GENEALOGY OF HEZRON AND CALEB (2:18-55):**
    + The genealogy doesn't conclude with David. It lists other family lines within the tribe of Judah, including the family of Hezron.
    + The documenting of these additional family lines would have been important to the Jews who returned from Babylonian exile, because most of them were descendants of the tribe of Judah.

Application

- The genealogies in the Bible make it clear the Bible is meant to be read as a genuine record of history.
- The Israelite people authenticated the genealogies in their scriptures and they didn't see them as works of fiction.
- These names represent real historical figures, and this fact is backed up by an ever-growing amount of archeological evidence.
